

Jack O'Lantern Extension Activity

1. Take a picture of your face (use Webcam or digital camera) and select just your head (and neck, if you prefer). Find a ghoulish cloak or ghost body and bring in both. Put both in a new layer group named GHOUL.
2. Add a Black and White adjustment layer clipped to each and modify so the black matches. You may wish for your head to be a little brighter than the body.
3. Modify each layer's opacity to be somewhat transparent... since you are a ghost!
4. Consider anything else you want (props, glow, fangs, etc.)
5. Save and then Save for Web and upload this second one to your SnackWebsites as well! (you can put it on the same page)
